

DIGESTIVE CANCER RESIDUALS

DC 7343 moves to the predominant documented residual after active disease and the code-specific transition.

EVIDENCE PLATE

CLAIM FILE

ORGAN	Surgical anatomy Document resection, ostomy, altered anatomy, adhesions, and reconstruction.	NUTR	Nutrition and weight Track weight, malabsorption, dietary support, deficiencies, and tube feeding.
BOWEL	Bowel dysfunction Record frequency, urgency, leakage, obstruction, pain, and treatment.	LIVER	Hepatic effects Use liver tests, imaging, portal complications, and the correct liver diagnosis.
SCAR	Abdominal scars Measure painful, unstable, adherent, or function-limiting scars.	CODE	Match the residual Use the diagnostic code that best describes the lasting predominant disability without duplicate compensation.
