

PROSTATE CANCER RESIDUALS

After DC 7528's transition rule, rate voiding or renal dysfunction as predominant and evaluate distinct residuals.

EVIDENCE PLATE

CLAIM FILE

VOID	Urine leakage Record absorbent-material use and changes per day.	FREQ	Urinary frequency Use daytime voiding intervals and nighttime awakening frequency.
OBSTRUCT	Obstructed voiding Document retention, catheterization, flow findings, and treatment.	RENAL	Renal dysfunction Use the current renal criteria when renal impairment is predominant.
ED	Erectile dysfunction Document diagnosis and relationship to cancer or treatment. Review SMC-K when raised.	BOWEL	Bowel effects Radiation or surgery can cause distinct bowel dysfunction requiring its own medical link and rating analysis.
