

CELIAC COMPLICATIONS MAP

Document each complication and determine whether it is part of the celiac rating or a separately ratable disability.

WHAT TO DOCUMENT

DIGESTIVE CLAIM FILE

BLOOD

Anemia and deficiencies

Iron, vitamin, folate, calcium, and related laboratory abnormalities can show malabsorption severity.

BONE

Low bone density

Preserve DEXA results, fractures, treatment, and the medical link to malabsorption.

SKIN

Dermatitis

Identify the diagnosis, treatment, frequency, and whether it is a systemic manifestation.

OTHER

Separate diagnosed residuals

Avoid duplicate compensation while evaluating distinct manifestations under the appropriate rules.
